LATISHA KHORANA

Williamsburg, VA | +1 (757) 882-0222 | latishakh@gmail.com | linkedin.com/in/latishakhorana | lkhorana.github.io

PROFESSIONAL SUMMARY

Data analyst and strategic consultant with 5+ years of experience delivering end-to-end analytical solutions across Thailand, Vietnam, and the U.S. in financial services, e-commerce, education, and healthcare verticals. Proven ability to write and optimize complex SQL queries and build Power BI dashboards that translate data into actionable business insights for cross-functional stakeholders. Track record includes turning contribution margin from -5% to +45% in 60 days at TikTok Shop and generating $85M in cost savings at Shopee. MSBA (STEM), William & Mary, GPA 3.88, Beta Gamma Sigma, Student Contributor Award.

WORK EXPERIENCE

Business Analyst I
Chartway Federal Credit Union | *Virginia Beach, VA* | **Aug 2026 - Present**

- Write, optimize, and validate complex SQL queries, including joins, aggregations, temp tables, and data transformation logic, to support data integration across credit union systems.
- Build Power BI dashboards and data models, applying DAX formula creation to present clear, actionable data stories and insights to business stakeholders.
- Analyze and interpret business reports, analytic models, and data sources, applying strong critical thinking and troubleshooting skills to identify root causes and solutions.
- Automate recurring reporting and data workflows to improve accuracy and reduce manual processing time.
- Operate as a self-starter, working independently and taking initiative to multi-task and manage priorities in a fast-paced, detail-oriented environment.
- Communicate complex analytical concepts and findings in a clear, concise manner to non-analytical audiences and cross-functional partners.

Technical Curriculum Writer
Mark Cuban Foundation (AI Bootcamp, Nonprofit) | *Remote* | **Jun 2026 - Present**

- Promoted from AI Curriculum Intern to a part-time (20 hrs/week) contractor role, continuing alongside a full-time position at Chartway.
- Develop Python and SQL curriculum for a national 4-H partnership track spanning 23+ topics, grounding project-based modules in the mathematical foundations of AI, including linear algebra, probability, gradient descent, and neural network architecture.
- Convert course materials into structured JSON and author technical curriculum for the Lovable platform.
- Design assessments and rubrics enabling students to implement supervised learning pipelines and evaluate model performance, bridging foundational theory to applied tool usage.

Residential Graduate Associate, Business Analytics
William & Mary | *Williamsburg, VA* | **Aug 2025 - Jul 2026**

- Design and deliver curriculum across AI for Business Analytics, statistics in R, and data manipulation in Python for 40+ MSBA students; translate mathematically complex concepts, including token economics, regression, classification, and time-series forecasting, into applied, business-relevant learning experiences.
- Assess and evaluate student work across assignments, projects, and papers; provide structured written feedback aligned to learning outcomes, supporting student performance improvement and academic progression.
- Lead independent NLP research on critical thinking and cognitive offloading in graduate AI tool usage, building custom Python pipelines with tokenization, TF-IDF, embeddings, and Facione-based multi-dimensional scoring.
- Promoted from Graduate Assistant; recognized with Beta Gamma Sigma Honors and Student Contributor Award for top-20% academic performance.

Manager, Operations and Analytics
TikTok Shop | *Bangkok, Thailand* | **Jan 2024 - Jul 2025**

- Queried and modeled 10M+ order-level records using SQL (CTEs, window functions) and Python (Pandas) to reconstruct contribution margin frameworks, turning profitability from -5% to +45% within 60 days.
- Built executive KPI dashboards in Tableau and Power BI tracking conversion rates, CAC, fulfillment costs, and retention metrics; findings directly informed weekly product and operations reviews with senior leadership.
- Engineered price elasticity and demand forecasting models (regression, time-series) to optimize subsidy allocation across Southeast Asian markets; communicated trade-off analyses and pricing strategy recommendations to non-technical stakeholders.
- Analyzed A/B experiments on pricing incentives and checkout flows, identifying key drivers of high-value order retention and translating results into product roadmap recommendations.

Senior Associate, Business Intelligence
Shopee | *Bangkok, Thailand & Ho Chi Minh City, Vietnam* | **Jul 2021 - Dec 2023**

- Promoted from Management Trainee (Graduate Leadership Program) to Senior Associate, Business Intelligence after rotating across Thailand and Vietnam market teams.
- Designed automated SQL dashboards monitoring campaign funnel performance, proactively surfacing optimization opportunities that drove 50% month-over-month growth in seller participation.
- Built regression-based risk and pricing models for micro-loan products, reducing default exposure and generating $85M in cost savings; presented methodology and business impact to finance leadership.
- Led cohort and scenario analyses for 11.11 and 12.12 campaigns, contributing to 35% YoY GMV growth through data-driven strategic recommendations.
- Modeled auction bidding behavior using dynamic pricing and engagement analytics, resulting in a 588% increase in platform engagement.

EDUCATION

M.S. Business Analytics (STEM), William & Mary, Raymond A. Mason School of Business — 2026
GPA: 3.88 | Beta Gamma Sigma Honors | Student Contributor Award
Certifications: Claude 101 (Anthropic), AI Fluency Program (Anthropic), AWS AI Practitioner, FERPA Compliance
B.B.A. Marketing and Finance, Thammasat University, Bangkok — 2021
Case Team Honors

LEADERSHIP & INVOLVEMENT

AI Fellow
William & Mary AI Fellows Program | *Williamsburg, VA* | **Jan 2026 - Present**

- Coordinated AI Day, an institution-wide event featuring speakers on AI integration across corporate, higher education, and military transition contexts; managed end-to-end logistics and speaker sourcing.

Tech Summit Club Member
William & Mary | *Williamsburg, VA* | **Oct 2025 - Present**

- Facilitated a Python fundamentals workshop for MBA students covering data structures, control flow, and introductory data manipulation.

KEY PROJECTS

AI Usage, Critical Thinking & Cognitive Offloading Research | Python, R, NLP — 2026

- Co-authoring peer research evaluating how AI tool adoption affects graduate student critical thinking; custom Python pipeline applies tokenization, TF-IDF, sentiment analysis, and Facione-based multi-dimensional scoring to quantify pre/post behavioral shifts.

FBI Crime and Census Data Pipeline | Python, PySpark, Clustering — 2026

- Built an end-to-end data pipeline integrating FBI crime statistics with Census socioeconomic data; applied clustering and predictive modeling to generate public safety resource allocation recommendations.

Student Performance Analysis | R, Machine Learning, Predictive Modeling — 2026

- Applied Decision Trees, SVM, Random Forest, Neural Networks, and PCA to a student performance dataset, uncovering variable interactions and predictive patterns missed by prior research.

Data Visualization Reconstruction | Tableau, Data Storytelling — 2026

- Audited and rebuilt a poorly designed visualization applying best practices in chart selection, color encoding, and layout hierarchy to improve analytical clarity and stakeholder communication.

Patient Retention and Churn Prediction | R, Random Forest, Logistic Regression (Lackey Free Clinic) — 2025

- Applied classification models in R to identify key patient churn attributes; delivered a data-validated retention roadmap to clinic leadership, demonstrating applied ML in a healthcare context.

Global Tariff Impact Evaluator | Python, Dash, Scenario Modeling — 2025

- Built an interactive dashboard engineering margin sensitivity logic based on supply chain dependencies, enabling stakeholders to simulate trade policy scenarios and assess business impact in real time.

TECHNICAL SKILLS

SQL (Joins, Aggregations, Temp Tables, Data Transformation, Data Integration, Debugging), PostgreSQL, BigQuery, Python (Pandas, NumPy, Scikit-learn), R, Power BI (Data Modeling, Dashboard Design, DAX), Tableau, Machine Learning, NLP, A/B Testing, Regression & Elasticity Modeling, Time-Series Forecasting, Predictive Modeling, Process Automation, Data Visualization, Curriculum Design, Stakeholder Communication, Git, Excel, Alteryx
